

St. John's InfoNET Information Provider's Agreement

An InfoNET *Information Provider* is a group or an organization that distributes information through the St. John's InfoNET web service. Each Information Provider will designate one person to be the authorized *Agent* to maintain the information and web site for the group or organization. A signing authority for the group or organization will submit a completed Information Provider's Agreement to the St. John's InfoNET Association. The signing authority should be the director, the president, or a member of the board of directors. The St. John's InfoNET Association, hereafter referred to as *the Association*, will provide web service under the following conditions:

1. The Information Provider will be given a directory on the InfoNET server accessible on the web via a URL of: <http://www.infonet.st-johns.nf.ca/DIRECTORY-NAME> and <http://www.sji.ca/DIRECTORY-NAME> where *DIRECTORY-NAME* is mutually agreed upon by the Association and the Information Provider. Disk space will be limited in consideration of available resources.
2. The Agent must obtain a personal InfoNET user account by completing the InfoNET User Agreement. The Association will make the directory referenced in the previous clause accessible to the Agent for creation and modification of the Information Provider's web pages.
3. The Agent will take responsibility for the accuracy of any information provided, *including keeping it up to date*.
4. The Agent will examine the information he or she places on the InfoNET, checking for any problems in content or appearance.
5. Except for links to remote files, and for images or files obtained within the public domain, the Information Provider will not add someone else's information to the InfoNET web service without the express permission of the owner of that information.
6. The Information Provider and its Agent will adhere to applicable copyright laws, licensing agreements and other legal restrictions on reproducing information, to abide by all InfoNET "acceptable use" policies, and to refrain from using the InfoNET for commercial purposes.
7. The Agent will clearly label information with the following: (a) the Agent's name, (b) an address, or a reference to a contact address, for the Agent, and (c) the date that information was added or last modified.
8. The Information Provider accepts that the Association and its members will NOT be legally or financially liable for any disruption of service.
9. The Information Provider will credit the services of the Association by placing, on the web page addressed by the URL in clause 1, a web anchor to the St. John's InfoNET web page, including (a) a clickable image of the InfoNET's logo as appears on this page and (b) a visible statement asserting that the page is hosted by the St. John's InfoNET Association.

If an Information Provider does not meet the terms of this agreement, the InfoNET Association may revoke its permission to distribute information through the InfoNET. If, for any reason, the Agent is unable to continue as a maintainer of the information, the Agent or the Information Provider should notify the InfoNET Association so that another can be found to continue the work.
